

Quarterly Training of Trainers schedule: **December 2021 - February 2022**

Courses	Modules	Mode	Start Date	Duration	Description
Cybersecurity	CyberOps Associate	Face-to-face	27-Dec-21	05 Hours	This Training of Trainers covers the CyberOps Associate course and will equip accredited trainers with the ability to train cybersecurity professionals capable of protecting and defending a company's network. It is a practical training extended over 5 days with practical and theoretical activities, and at the end an accreditation as a Cisco CyberOps Associate trainer.
CCNA Enterprise	CCNA 1&2 - ITN - SRWE	Face-to-face	10-Jan-22	10 Days	Training of Trainers on the first two Modules of CCNA v7. Designated potential trainers should be familiar with the full content of these two modules before participating in this training. They are requested to register at least two weeks before the date of the Face-to-Face training in order to access the training content. At the end of the training, the learners will obtain the accreditation of trainers and will be able to deliver these CCNA modules in their respective academies
CCNA Enterprise	CCNA 3 - SRWE	Face-to-face	24-Jan-22	05 Hours	This Training of Trainers is intended for trainers who already have the accreditation to teach CCNA 1 & 2 modules, or existing trainers keen to discover the novelties of version 7 in terms of security and automation. As the training is practical, it is desirable that potential candidates familiarize themselves with the training content at least 2 weeks before the start of the training.
Security	Network Security	Online	15-Jan-22	30 Hours	This training of trainers will provide candidates with the opportunity to train professionals capable of securing corporate networks and preventing intrusions. The training will take place online in virtual sessions of 2 hours each, spread over a period of 3 weeks. The synchronous or asynchronous participation of the learners is compulsory. The language of training is French and the exams in English.
CCNP Enterprise	CCNP ENCOR	Face-to-face	7-Feb-22	10 Days	The CCNP ENCOR Trainer training will allow accredited trainers to train professionals on the establishment of complex corporate networks and will take place in a face-to-face mode. Potential candidates for this training must familiarize themselves as quickly as possible with the different technologies.
DevNet	DevNet Associate	Online	3-Feb-22	30 Hours	This training will equip learners with the necessary software skills that will allow them to automate networks and innovate. The training will take place online in virtual sessions of 2 hours each for a period of 3 weeks
Python	PCAP	Online	7-Jan-22	20 hours	This training will equip future trainers with the software skills necessary to lead learners to two levels of Python certification: Certified Entry-Level Python Programmer and Certified Associate in Python Programming Certification. The training will take place online in virtual sessions of 2 hours each during 3 weeks
IT Essentials	IT Essentiel - Maintenance	Online	On demand	20 hours	This semi-tutored training will equip future trainers with the hardware and software maintenance skills needed to troubleshoot computer systems. The training will take place online through virtual sessions in real time and recorded sessions of 2 hours each for a defined duration.

Please note the following conditions that apply to the training:

1. Instructors MUST work through the course material before attending the training

- 2.** The above dates are planned dates. We reserve the right to cancel classes should too few instructors enroll in a class. We will notify all enrolled instructors if the schedule has to change at least 2-3 weeks before the start date of the course via the e-mail address registered on the Cisco NetAcad portal at the time. The ITC's liability in the event of such cancellation will be limited to only the course fees that have already been paid by the affected individual or institution for the specific canceled class.
- 3.** All enrolments or cancellations should be confirmed via e-mail (asc.support@nta.academy).
- 4.** Should you need a letter of invitation, please e-mail asc.support@nta.academy and provide the following details: First Name, Surname, Passport Number, and course/s that you have enrolled for.
- 5.** To enable us to process the invoices for training costs, please provide the following details: Institution name, Postal Address, Contact details of the person responsible for the invoice (First Name, Surname, e-mail, fax number, telephone number)
